Task Order Request, Contract RD-76

Please Return To
Engineering StaffFile per
Task Order
#

1. This Office has recently requested a new Task Order under Contract RD-117 with the [redacted] for the design and fabrication of radio relay equipment. The work is being done on a CRASH basis due to an urgent field requirement. During the course of work it was discovered that operational advantage could be gained if a special timing device could be produced within the short time available.

2. Our Engineering Staff contacted representatives of the [redacted] who are presently engaged in timer development under Contract RD-76. Discussions with the company resolved the technical characteristics and delivery schedule. Technical approval to commence work on the project was supplied the company based on informal approval by the Contracting Officer. The attached cost estimate and technical description submitted by the contractor have been reviewed and found acceptable. It is understood that the Contracting Officer will now confirm his approval by assignment of a new task.
